IPEmotion News No. 03, 11th of September 2009

www.IPEmotion.com

NEW IPEmotion V.01.02.00 available!

Now it's done! The new IPEmotion version V.01.02.00 is ready for download!

Highlights of the new version:

- Flexible limit value monitoring
 - Displaying of limits
 - Definition of editable text messages
- New file formats for data storage and data export
 - PD5
 - GPX
 - Further information available @ [» DirectFormat](#)
- Undo / Redo - function
- Time channel management
 - Absolute or relative time
 - Either one time channel per measurement channel or one time channel for all measurement channels with the same sampling rate
- Generating runtime versions
 - No additional license costs
 - Unlicensed distribution without supervision

**Look and see!
30-days the full functionality!**

NEW hardware drivers of IPEmotion!

There are new hardware drivers (so called M.A.L.-PlugIns) online available for you to download:

- IPETRONIK Logger-M.A.L.-PlugIn
 - Current version: V.03.18.00
 - Configuration of IPETRONIK data loggers
 - Storing and displaying at the same using XCP-Service
 - Requirement: TESTdrive 3.18.02 or higher
- GPS M.A.L.-PlugIn
 - Current version: V.01.00.00
 - Connection to GPS receiver
 - Acquisition of GPS data
- Video M.A.L.-PlugIn Beta

- Current version: V.00.00.00 beta
- Integration of webcams
- Synchronous acquisition of video data
- At the moment still beta status
- IPETRONIK CAN M.A.L.-PlugIn
 - Current version: V.01.02.00
 - Support of Mc-THERMO
 - Configuration of all IPETRONIK CAN devices
- CAN M.A.L.-PlugIn
 - Current version: V.01.01.00
 - Integration of established CAN interfaces
 - Direct measurements on CAN-Bus

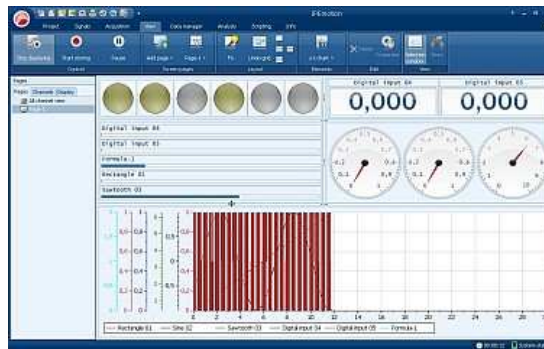

You will find further useful information and the M.A.L.-PlugIn documentation at the IPEmotion Forum.

All M.A.L.-PlugIns are available @ » [M.A.L.-Downloads](#) «

ALL in ONE & ONE for ALL!

- Easy handling!
- Configuration of different hardware devices with ONE software
- Automatic and guided configuration
- Measurement results with one click ONLY
 - » [OneClickAcquisition](#)
- Storing in different file formats, at the same time!
 - » [DirectFormat](#)
- Hardware independent by the open interface concept
 - » [M.A.L.-PlugIn](#)
- Easy to use data analyses, without stopping the measurement
 - » [EffectiveView](#)
- Add channels, change displays, while collecting data
 - » [LiveAdaption](#)
- 2 types of automation - » [DualAutomation](#)
 - Macro recorder (VB-Script) for repetitive measurement tasks
 - COM-Interface - complete remote control of IPEmotion through 3rd-party software
- Synchronous data acquisition
 - » [InterSynchrony](#)
- Fast and qualified IPETRONIK Support
 - » [DirectSupport](#)

NEW driver concept - Open to everything!

The **M.A.L.-PlugIn concept** of IPEmotion is an unfolded interface concept, which allows to connect to all hardware devices. M.A.L.-PlugIns (Manufacturer Application Layer) define the communication between IPEmotion and hardware. It also defines which values are transferred and how to set up your hardware devices. Developing a M.A.L. you don't have to care for basic functions of IPEmotion like storage groups or visualizations.

The open driver concept is based on the open source principle. This means that everyone can create such hardware drivers so called M.A.L.s! Use the SDK (Software Development Kit) of IPEmotion to get your hardware devices connected. With the SDK you can create M.A.L.-PlugIns easily and straight forward. We provide you the IPEmotion SDK and also all needed documentation online for free.

For Downloading all developed M.A.L.s, example-M.A.L. incl. SourceCode and the required SDK click here » [M.A.L.-Downloads](#)
