

Right out of the starting gate IPETRONIK had the pole position with IPEmotion.

The spectacular IPEmotion kick off event was held on the 17th February in Baden-Baden, Germany. Everyone in attendance are united in their opinion that IPETRONIK delivered a great solution for data acquisition with the revolutionary IPEmotion data acquisition software. The media has also weighed in and reported in great detail about IPEmotion and its benefits.

www.ipemotion.com - ONLINE NOW!

IPEmotion was developed in roughly three years. We started development of this ground breaking software from scratch. It was worthwhile to take this time to use all of our measurement expertise to make IPEmotion an extremely user friendly and flexible data acquisition software. No matter if you are experienced in the field of data acquisition or a beginner, IPEmotion is the right fit for you!

IPEmotion stands for "MEASUREMENT SIMPLIFIED". Whether we are talking about acquiring data, changing formats during the measurement processes, or about automating the measurement processes, you can cover it all with IPEmotion. With its ease of use comes precious time saved with out compromising quality.

IPEmotion – Open to everything

IPEmotion is enhanced with your feedback and ideas. You have the freedom to implement interfaces (M.A.L.s) for various measuring hardware devices through our IPEmotion web portal. You can share your experiences in detail in the IPEmotion Online-Community.

At the [Online Shop](#) you can acquire the different editions of this software.

Go there now and download IPEmotion!
